**To:** Peter Bassett  
**Subject:** ISO 50001 implementation reference

To whom it may concern,

Peter Bassett of EPS has been working with 3M to successfully implement the energy management standard ISO 50001 at 3M facilities in Canada for over 4 years now. Starting in 2011, Peter has provided excellent overall leadership to the ISO 50001 implementation process leading to successful certification of ISO 50001 at the 3M Brockville facility and then at the 3M London facility. He is assisting us with ISO 50001 implementation currently at our 3M Perth Tape and 3M Perth ScotchBrite facilities. Jean-Michel Sylvestre of EPS has also provided excellent technical training in support of the ISO 50001 implementations. I would be happy to recommend EPS to other organizations wishing to implement ISO 50001.

Please don't hesitate to contact me for more information

Best Regards

---
